

## NAME

Math::BigInt::CalcEmu - Emulate low-level math with BigInt code

## SYNOPSIS

```
use Math::BigInt::CalcEmu;
```

## DESCRIPTION

Contains routines that emulate low-level math functions in BigInt, e.g. optional routines the low-level math package does not provide on its own.

Will be loaded on demand and called automatically by BigInt.

Stuff here is really low-priority to optimize, since it is far better to implement the operation in the low-level math library directly, possible even using a call to the native lib.

## METHODS

`__emu_bxor`

`__emu_band`

`__emu_bior`

## BUGS

Please report any bugs or feature requests to `bug-math-bigint` at [rt.cpan.org](http://rt.cpan.org), or through the web interface at <https://rt.cpan.org/Ticket/Create.html?Queue=Math-BigInt> (requires login). We will be notified, and then you'll automatically be notified of progress on your bug as I make changes.

## SUPPORT

You can find documentation for this module with the `perldoc` command.

```
perldoc Math::BigInt::CalcEmu
```
